## Ram Avatar S

.NET Developer | Self-taught Full Stack Developer in NodeJS

Being an autodidact and an astute learner I started working as a freelancer to help support my family financially although I had landed a great job on campus. Even then, I was still having doubts about the stability of my income source. I was anxious. I was unprejudiced and was looking for options and have embarked on my own entrepreneurship journey, where I am now primarily focusing on building up personal assets for a stable financial future and help others in doing the same.

## WORK EXPERIENCE

### Facebook Ad creation

#### Associate Product Engineer

sept 2015 to Jan 2016
